DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 3, 4, 9, 11, 12, 13 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by US 4,286,736 to Corsette.

Corsette shows a fluid dispensing pump for dispensing fluid from a container having a skirt 17 to connect the pump assembly 10 to a reservoir, an actuator 25, a biasing element 51, a pump chamber 11, a reservoir opening 46 in communication with the reservoir, the pump assembly having a cylinder 22 slidable disposed and retained in the pump chamber and having a dispensing channel 26 and being movable to a locking position, a check valve mechanism 43, the cylinder 22 has cylindrical extension member axially aligned the length of the dispensing channel pass the transverse wall 52, see Fig. 1, when the pump is in the lock position the radial extending member in the cylinder engages and releaseably attaches to the check valve mechanism, see column 4, lines 12-29, the radial extension tapers in at the location of the annular seal 47.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3754

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 5-8, 10, 14-17 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 4,286,736 to Corsette et al. in view of US 5,720,419 to Li.

Corsette shows all claimed features as discussed above but is silent about using an elongated shuttle valve. Li shows a pump sprayer using an elongated shuttle valve 42 as seen in Fig. 1, or a spherical check valve as seen in Fig. 7. Li shows that the uses of spherical or elongated shuttle valves are equivalent structures use in the art. Therefore, because this two check valves were art recognized equivalents at the time the invention was made, one of ordinary skill in the art would have found it obvious to substitute the spherical check valve in the device of Corsette for the elongated shuttle valve of Li.

Allowable Subject Matter

5. Claims 20 and 22-24 allowed.

Response to Arguments

6. Applicant's arguments with respect to claims 1 and 11 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3754

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
